*Melbourne, FL 32901, USA*

In the above paper published in the *Journal of Applied Mathematics and Stochastic Analysis*, 6, Number 4, 359-384, Winter 1993, the below formulas on page 368 appeared to be erroneous. They should read as follows:

$$(4.3a) \quad G_{N-i}(z) = \begin{cases} z^N \mathfrak{J}_x^{N-i-1} \left\{ \frac{a(z) - a(x)}{(z-x)(1-a(x))} \right\}, & i < N, \\ z^i, & i \geq N. \end{cases}$$

$$(5.1b) \quad H^R(h)(z) = h(z) + \mathfrak{J}_y^{R-1} \left[ \frac{z^R h(y) - h(yz)}{1-y} \right], \quad i \in \Psi.$$
