

Test SMDs Repository

The following test SMD files have been provided to assist implementers of the SMD technology in testing their own implementations.

Agent/Holder Trademarks:

Based on the data elements provided, SMDs can be classified in two types:

- SMDs generated for marks managed by a Trademark Agent - the string "Agent" in the filename indicates an SMD of type Agent.
- SMDs generated for marks managed by Trademark Holders directly - the string "Holder" in the filename indicates an SMD of type Holder.

Language:

The latest batch of 4 test SMD files have all been generated with data (not headers) in English.

When test SMD files are generated in languages other than English, they include the IDN labels (<mark:label>).

The language of the SMD is always specified in the test SMD filename.

Active/Revoked SMDs:

- The string "Active" in the filename indicates that the SMD has NOT been revoked (**NOT** included in the SMD Revocation List).
- The string "Revoked" in the filename indicates that the SMD has been revoked (**INCLUDED** in the SMD Revocation List).

x509 certs:

The test SMD ICANN-CA certificate can be found here:

https://ca.icann.org/tmch_pilot.crt

Note: This CA certificate is for testing purposes only and is not the production CA.

The test SMD ICANN-CA CRL can be found here:

http://crl.icann.org/tmch_pilot.crl

Note: This CRL is for testing purposes only and is not the production CRL.

SMD Revocation List:

The test SMD Revocation List can be found here:

<http://newgtlds.icann.org/en/about/trademark-clearinghouse/smd-test-revocation-05dec13-en.csv>

SMDs

The latest batch of 4 test SMD files have all been generated without whitespaces.

The following test SMD is Active (**NOT** included in the SMD Revocation List, signed with a non-revoked TMV certificate and the XML signature is valid):

<http://newgtlds.icann.org/en/about/trademark-clearinghouse/smd-active-25nov13-english.smd>

The following test SMD is Revoked (**INCLUDED** in the SMD Revocation List, signed with a non-revoked TMV certificate and the XML signature is valid):

<http://newgtlds.icann.org/en/about/trademark-clearinghouse/smd-revoked-25nov13-english.smd>

The following test SMD is Active (**NOT** included in the SMD Revocation List, signed with a non-revoked TMV certificate and the XML signature has been tampered with, to make it invalid):

<http://newgtlds.icann.org/en/about/trademark-clearinghouse/smd-invalid-25nov13-english.smd>

The following test SMDs are Active (NOT included in the SMD Revocation List, signed with a revoked TMV certificate and the XML signature is valid):

<http://newgtlds.icann.org/en/about/trademark-clearinghouse/smd-tmvrevoked-25nov13-english.smd>
