

SUMMARY

A. O. Mostafa, Z. M. Saleh – <i>A Class of Meromorphic Functions with Positive Coefficients Defined by q-Analogue Linear Operator</i>	1
Ali Uğum – <i>Canal surface whose center curve is a spherical curve with spherical frame</i>	15
A. Shokri – <i>Ideals in the Banach algebras of α-Lipschitz vector-valued operators</i>	33
A. Çelik – <i>An approach to symmetric numerical semigroups</i>	43
Daniel Abraham Romano – <i>Some classes of interior co-ideals in Γ-semigroup with apartness</i>	49
H. Shayanpour, A. Nematizadeh – <i>Fixed point theory for Ciric-type-generalized φ-probabilistic contraction in probabilistic Menger spaces</i>	65
M. R. Bakshi, K. K. Baishya, A. Das – <i>Hyper generalized weakly symmetric $(CS)_4$-spacetime and the Ricci solitons</i>	83
M. Budden and B. Collins – <i>Some Variations of Multicolor Rado Numbers</i> ..	93
