

SUMMARY

A. Akgul, S. Bulut – <i>On o certain subclass of meromorphic functions defined by Hilbert space operator</i>	1
A. Charifi, S. Kabbaj, D. Zeglami – <i>Non-Archimedean stability of generalized Jensen's and quadratic equations</i>	11
H. E. Darwish, A. Y. Lashin and A. N. Alnayyef – <i>On neighborhood and partial sums for certain subclass of meromorphic functions defined by convolution</i>	31
B.Bektaş, E.Ö.Canfes and U.Dursun – <i>On rotational surfaces in pseudo-euclidean space \mathbb{E}_t^4 with pointwise 1-type Gauss map</i>	43
M. Azari and A. Iranmanesh – <i>On the vertex-edge Wiener polynomials of the disjunctive product of graphs</i>	61
M. Rafiullah, D. K. R Babajee, Dur-e-Jabeen – <i>Ninth Order Method for Nonlinear Equations and its Dynamic Behaviour</i>	73
S. Joshi, S. Joshi, H. Pawar – <i>On a certain subclasses of bi-univalent</i>	87
S. Shams, P. Arjomandinia – <i>Starlikeness conditions for normalized analytic functions including Ruscheweyh operator</i>	97
S. S. Billing, Kimmi Markan – <i>A remark on a subclass of analytic functions</i>	105
T. Yavuz – <i>Coefficient Estimates For Certain Subclasses of Spirallike Functions</i>	115
M.K. Aouf, A.O. Mostafa, O.M. Algubouri – <i>Some families of uniformly starlike and convex functions with negative coefficients</i>	125
Y. Taleb, F. Achemine, D. Hamadouche and A. Aissani – <i>Gaussian approximation for the busy period distribution in M/G/1 retrial queue</i>	149
