- **ADSL2+ Internet Access**
- **Media Bandwidth Management**
- **2 IPSec VPN Support**
- **Trend Micro Security Service (Embedded)**

Benefits

Higher-speed Internet Access

The P-661H-D Series is capable of supporting high-speed ADSL, ADSL2 and ADSL2+ over existing copper lines. With speeds of up to 12Mbps (ADSL2) or 24Mbps (ADSL2+), the P-661H-D Series offers higher data transfer rates and better bandwidth than traditional ADSL enabled gateways. The P-661H-D Series also support RE ADSL (Reach Extended ADSL) for better performance at greater distance. The P-661H-D Series offers the key link between today's communications services and tomorrow's converged services.

Robust Firewall Security and IPSec VPN

The ICASA-certified ZyNOS operating system ensures state-of-art firewall performance and robust security from the P-661H-D series. Based on Stateful Packet Inspection, DoS (Denial of Service) and DDoS features, it provides the first line defense against hackers, network intruders, and other harmful threats. Furthermore, its VPN feature supports data encryption over the Internet to ensure secure data transmission between two sites, and can be used to replace a private leased line, allowing global interconnectivity with minimal expense.

Easy Setup with Multimedia Auto Provisioner Express (MAP Express)

Through its interactive multimedia interface, ZyXEL Multimedia Auto Provisioner Express (MAP Express) offers comprehensive instructions for even non-technical users to follow step by step to easily install and configure the device with simple mouse clicks.

With the interactive Installation Tutorial, users can change the speed of the presentation using the control.

Trend Micro Security Service (Embedded)

The embedded Trend Micro Home Network Security Service (TMSS) feature not only helps to identify the vulnerabilities and security holes on PCs, but also protects both the network and the PCs within from virus and hacker attacks. TMSS includes redirected page setting, virus protection and parental control that is easy to configure via the TMSS Dashboard.
