

# SAP NetWeaver Security & Identity Management

## Integration Overview

Mr. Jürgen Bierlein,  
Senior Integration Consultant

SAP Integration and Certification Center  
2nd December 2010

# Agenda

- 1. Current Security Interfaces**
2. Certification process overview

# SAP NetWeaver Security & Identity Management

## Special offer

## SAP Security Certification Promotion to ISVs

### 50% DISCOUNT OFFER FOR EMERGING COMPANIES

- Sign-ups for following [Security certification scenarios](#):  
BC-SNC, BC-SSF, BC-AUTH-SAML, BC-AUTH-JAAS, NW-VSI, NW-IDM-CON, BC-LDAP-USR and Security Integration Assessments
- If your company meets at least one of the following criteria, you will be eligible to receive a 50% discount on the certification.
  - Criteria to qualify as a emerging company: (at least one must be applicable):
    - Number of employees does not exceed 50
    - Company is not older than less or equal 5 years
    - Maximum of 5 own products

#### Attention

- Please note the prerequisites
- Deadline for contract signature: 15<sup>th</sup> of December 2010
- In case of multiple promotions for a service, SAP has the right to decide the appropriate discounts

### 20% DISCOUNT OFFER FOR ALL ISVs

- If your company does not fit into the emerging category, ICC is now offering a 20% discount on ALL certifications, for ALL vendors

Interested?

Please send an email to [softwaresolutionpartner@sap.com](mailto:softwaresolutionpartner@sap.com)  
and sign up by 15<sup>th</sup> of December 2010!

# SAP NetWeaver Security & Identity Management Solution Map

Compliance	Regulatory Compliance	Auditing	SAP Solutions for Governance, Risk and Compliance		Security Targets
Secure Collaboration	Web Services Security	Content Security	Security Interoperability		
Identity and Access Management	Identity Management	Authorization Concepts and Management	Authentication and Single Sign-On		
Infrastructure Security	Network and Communications Security	Operating System and Database Security	Front-End Security		
Software Lifecycle Security	Secure Product Development	Secure Delivery	Secure Configuration	Secure Change Management	Security Governance

# SAP NetWeaver Security & Identity Management Interfaces Overview

## SECURITY

Interface		SAP R/3 Release	SAP NetWeaver Application Server Release	SAP NetWeaver Release		
Interface	Name	4.6	6.10 / 6.20	6.40	7.0	7.1
<a href="#">BC-AUTH-JAAS</a>	Java External User Authentication JAAS			<b>New Scenario</b>	No Change	No Change
<a href="#">BC-AUTH-SAML</a>	Security Assertion Markup Language			<b>New Scenario</b>	No Change	No Change
<a href="#">BC-LDAP-USR</a>	Directory Interface for User Management via LDAP		<b>New Scenario</b>	No Change	No Change	No Change
<a href="#">BC-SNC</a>	Network Security	No Change since R/3 4.0	No Change	No Change	No Change	No Change
<a href="#">BC-SSF</a>	Secure Store & Forward and Digital Signatures	No Change since R/3 4.5	No Change	No Change	No Change	No Change
<a href="#">NW-IDM-CON</a>	SAP NetWeaver Identity Management Connector					<b>New Scenario</b>
<a href="#">NW-VSI</a>	Virus Scan Interface			<b>New Scenario</b>	No Change	No Change

# External User Authentication BC-AUTH-JAAS

## Definition

- The SAP Web Application Server Java offers a pluggable authentication framework, which is based on JAAS standards (Java Authentication and Authorization Service).
- Allows arbitrary login modules to be plugged in and to be combined with login module stacks.
- Vendors can provide additional login modules for additional authentication mechanisms.

## Scope

- This certification verifies a 3rd party JAAS login module and fulfills the requirements for a proper functionality in SAP Web Application Server Java.

BC-AUTH-JAAS](#)

## Online Listing

- [Partner Information Center](#)

## Pricing

- **10,000 Euro Per Certification**

Up to 50% discount if you sign up  
by 15<sup>th</sup> of December 2010!

# Security Assertion Markup Language

## BC-AUTH-SAML

### Definition

- The SAP J2EE Engine supports the use of Security Assertion Markup Language (SAML) for Single Sign-On.
- SAML is a XML-based markup language, that is being developed and standardized by the Organization for the Advancement of Structured Information (OASIS).
- It is used for exchanging security-related information between communication partners.
- The SAP J2EE Engine supports SAML in a scenario where a user is authenticated to an external authentication system that acts as an SAML authority.

### Scope

- Based on this authentication, the user can access the desired resource, in this case, an application on the SAP J2EE Engine.

### Pricing

- 10,000 Euro Per Certification

Up to 50% discount if you sign up  
by 15<sup>th</sup> of December 2010!

# Directory Interface for User Management via LDAP

## BC-LDAP-USR

### Definition

- SAP's directory interface lets you consolidate user data from SAP systems with data from directories that implement the Lightweight Directory Access Protocol (LDAP).
- Using a directory service (including the SAP Central User Administration), you can maintain the data from a single point of contact.
- At most companies, user data is stored in the directories associated with various software systems and components, such as e-mail, telephony systems, operating systems, and other data-dependent applications.
- By using the directory interface for user management via LDAP, you can consolidate this data in a single, central directory often called the Meta Directory.
- This consolidation enables you to eliminate redundancy and ensure data consistency across multiple applications, while offering all of the advantages of a single point of administration.

### Scope

- Using the LDAP directory interface to connect to an LDAP directory server.

### Pricing

- 10,000 Euro Per Certification

Up to 50% discount if you sign up  
by 15<sup>th</sup> of December 2010!

# Network Security

## BC-SNC

### Definition

- BC-SNC protects data that is exchanged between distributed SAP NetWeaver components and an integrated external security system, and enables the use of cryptography and smart cards to authenticate users.
- An SAP NetWeaver system administrator can adjust the level of protection by setting SAP NetWeaver profile parameters for BC-SNC.
- When we refer to SNC, we are referring to a software layer that SAP has implemented within all relevant SAP NetWeaver components to achieve the protection goals described above.
- As the programming interface between the SNC layer and external security products we use the standardized *Generic Security Services Application Programming Interface (GSS-API) Version 2 [1;2]*. This standard has been developed by the "Common Authentication Technologies" (CAT) working group of the Internet Engineering Task Force (IETF)

### Scope

- The external security system can provide strong authentication, data integrity, and data confidentiality services to the SAP communication layer.

Up to 50% discount if you sign up  
by 15<sup>th</sup> of December 2010!

# Secure Store & Forward and Digital Signatures

## BC-SSF

### Definition

- Secure Store & Forward (SSF) provides functions that SAP NetWeaver applications can implement in order to protect sensitive data.
- This is particularly useful if data is transferred across insecure networks or is stored on external media.
- Digital signatures and encryption ensure the integrity of the data, the authenticity of the sender, nonrepudiation, and confidentiality.

### Scope

- SSF mechanisms use an external security system to protect SAP data. The external system is linked using a SAP NetWeaver interface defined by SAP in the SSF Application Programming Interface (API).

# SAP NetWeaver Identity Management Connector NW-IDM-CON

## Definition

- The purpose of the Connector Development Kit (CDK) is to enable the independent software vendors (ISVs) or SAP partners to create an Identity Management connector for their application, and to integrate the application in the Identity Management landscape.
- The provisioning framework in the Identity Center is the core of the provisioning, and will call the basic tasks to perform the operations in the target systems, i.e. the framework populates the Identity Center with a set of basic tasks for performing provisioning.

## Scope

- Create an Identity Management Connector to connect to the vendor security product.

## Pricing

- 10,000 Euro Per Certification

Up to 50% discount if you sign up  
by 15<sup>th</sup> of December 2010!

# SAP Virus Scan Interface NW-VSI

## Definition

- The SAP NetWeaver Virus Scan Interface (NW-VSI) allows external anti-virus and content security solutions to integrate with SAP Web AS (ABAP/JAVA).
- This Virus Scan Adapter is built by the anti-virus solution provider based on SAP templates in the Software Development Kit (SDK) for Virus Scan Adapters.
- This standardized process provides a transparent job division between SAP data to be scanned (SAP know-how) and the actual virus scan (Anti Virus know-how).
- Additionally, it also allows SAP customers to easily switch between anti-virus and content security solutions based on their business needs.

## Scope

- Build an Virus Scan Adapter which connects a virus scanner to the SAP system.

## Join SAP PartnerEdge and Learn about the SAP Integration Certification Program

- Access to technical sessions
- For SAP Partner:
  - **Technical Enablement Offers**
  - Partner Service Advisor guidance (for Partners only)
- **SAP Developer Network (SDN)**
- ICC Services Desk  
[softwaresolutionpartner@sap.com](mailto:softwaresolutionpartner@sap.com)
- Complete formal process -  
→ Certification Contract and Fees

## Receive technical information

- Contact with an ICC Consultant
- SAP Remote Access and Connectivity Kit (SAP RAC Service)
- Access to low-cost, no maintenance Hosted test systems of several SAP solutions (ERP, CRM, etc.) for integration testing

## Complete certification

- Certification against standard and custom integration scenarios

## Receive Certification Benefits

**SAP Certified**  
Integration with SAP NetWeaver

- SAP Certified Logo
- Test report and Certificate
- Online Listing  
“PIC” , <http://ecohub.sap.com>
- Marketing Support and Tools
- Events
- Qualify for SAP PartnerEdge
- Get full Membership
- Keep your certification current
- 3-year validity
- Monitor SAP Release Changes
- Recertify! (50% discount for SAP PartnerEdge Member)

**Deadline: 15th of December 2010!**
