

Centralized Logging, Reporting Analyzer for ZyWALL Internet Security Appliance

- Ease of use and deployment
- Friendly web-based user interface
- Comprehensive graphical reports
- One-click on-demand report available
- Real time and historical reports available
- Report aggregation from one to multiple ZyWALL devices
- Concurrent sessions support

Network Reporting Analyzer

VANTAGE
REPORT 2.2

Benefits

Availability

ZyXEL Vantage Report 2.2 (VRPT 2.2), a web-based centralized reporting system for quickly and conveniently collecting and analyzing a distributed network, provides system administrator of Corporate or MSSP a simple and direct method of monitoring multiple ZyWALL Internet security and IDP appliances. With ZyXEL VRPT 2.2 system administrator can easily monitor network access, attack, intrusion and bandwidth usage of network application. The information can be further used for tuning the configuration on ZyXEL ZyWALL Internet security appliances in advanced to enhance control of bandwidth management and network security.

Manageability

ZyXEL VRPT 2.2 integrates advanced Web server, syslog server, scheduling engines, and database for system administrator to analyze ZyWALL logs. The intuitive user interface saves administration and installation time. Whether connecting securely from a local or remote system, using a standard browser greatly simplifies access and navigation.

Web-based User Interface

All reporting functions are performed from ZyXEL VRPT 2.2 password-protected Web User Interface, simplifying deployment and access from a local or remote system using a Web browser application.

Comprehensive Graphical Reports

ZyXEL VRPT 2.2 offers a comprehensive set of real-time and historical reports including firewall attacks, bandwidth usage, Web site usage, user activity, and more, allowing organizations to be aware of suspicious activity and to ensure high employee productivity. ZyXEL VRPT 2.2 provides summaries of all types of network attacks and informative reports of user behavior, identifying time-wasting or bandwidth intensive activity.

Scheduled Report Automatically

ZyXEL VRPT 2.2 provides support for emailing and archiving daily and weekly reports, allowing users to share data with the management team and to archive the reports for future use.

Specifications

Hardware

- Server requirement:
 - CPU: Intel P4 2.6G or better
 - Memory: 1024M or better
 - Hard Disk: 80G or better
- Client requirements: CPU: Intel P3 450 MHz or better

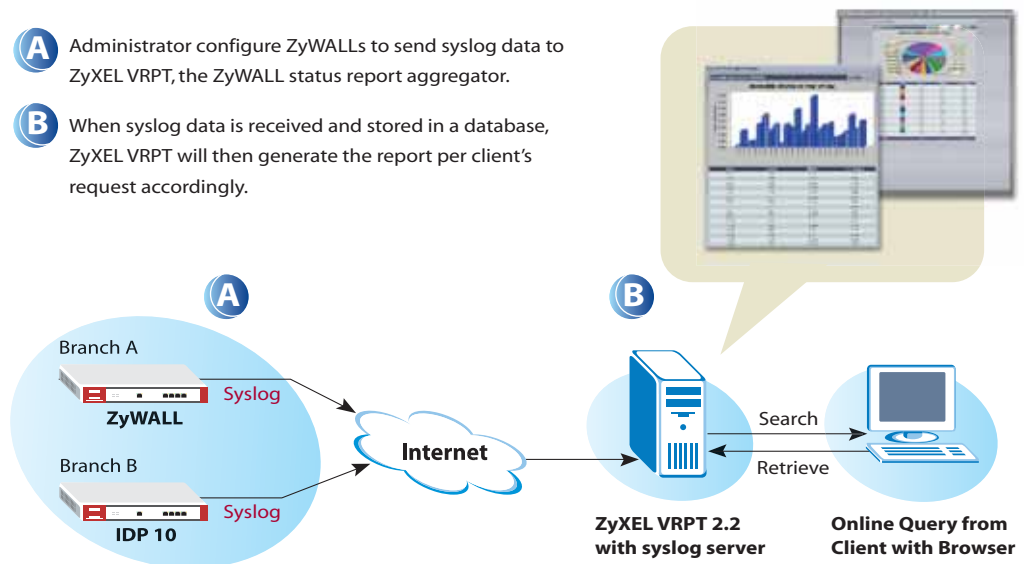

Software

- Java-Run Time Environment
- Server: Windows XP/2000 Server
- Client: Microsoft IE 6.0 or later.
- Screen resolution supported: 1024x768

Application Diagram

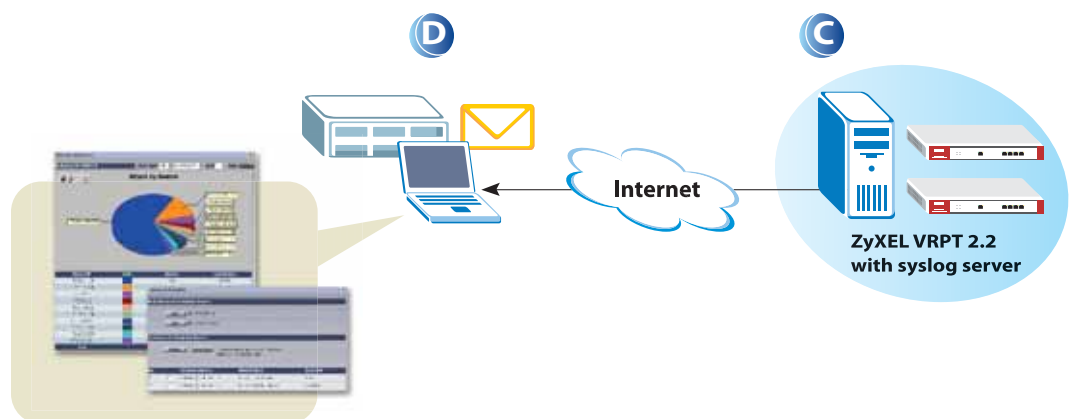

Online Query

- Administrator configure ZyWALLs to send syslog data to ZyXEL VRPT, the ZyWALL status report aggregator.
- When syslog data is received and stored in a database, ZyXEL VRPT will then generate the report per client's request accordingly.

Scheduled Report System

- Schedule and configure daily or weekly report on ZyXEL VRPT, the ZyWALL status report aggregator
- The pre-scheduled report can be sent to corresponded email address accordingly
